The Time *Dependency* Hub

Time, identity, consequence, continuity and free will, rebuilt from one primitive: dependency.

WHAT IT IS

One long document that opens with a line map. Chapter 11, *No un-I-am*, is about what an AI is and what cannot be undone.

WHO IT'S FOR

Readers who want the theory of time and identity underneath the library. One of the three picks for scientists.

WHERE TO BEGIN

1. Attach `time-dependency-hub_v40.md` and paste its prompt.
2. Let it take its time: it is long.

HOW IT RELATES

With the continuity problem already taken apart by the Atlas, its account of time and identity has somewhere to land.

WHERE THIS SITS IN THE LIBRARY

The four steps in order, with the side doors you can open any time.

The prompt is at `iucdm.org/library/docs/prompts-time-dependency-hub.html`, with a Copy button, and in `00-HUMAN-PROMPT-GUIDE.md` in this folder.
